LOCATION: Medford, Taylor

PROJECT REQUEST:

Select an A/E consulting firm to provide design and construction phase professional services associated with the design and construction of the MEDFORD Armory Remodel Latrine project.

PROJECT NUMBER: 15H1G

PROJECT DESCRIPTION:

Rehab latrine to create new, updated, and ADA compliant rest rooms and showers.

PROJECT JUSTIFICATION:

The original armory design did not include adequate shower facilities for females. In addition, ADA requirements have changed since the original construction. Both full and part-time soldiers are required to pass a physical fitness test annually, and they use the armory facility during the week and on weekends for physical fitness training in preparation for that event. Adequate shower facilities are required in armories so that male and female soldiers can clean up after their physical fitness tests.
