LOCATION

Cedar Corporation's corporate headquarters is located in Menomonie, Wisconsin. To better serve our clients, we have additional offices located in Madison, Green Bay, and Cedarburg, Wisconsin.

OVERVIEW

Our mission, as a service based engineering, architectural, planning, environmental, landscape design, and land surveying firm, is to provide the highest standards of design excellence and service to our clients. Our goal is to develop a team relationship between our clients and our staff. We possess the technical expertise necessary to meet the demands of our clients on a timely basis and within budget guidelines.

Repeat business with numerous public and private clients attests to our ability to assemble a team concept with our clients; to work with them and within their guidelines. Confident of this, we respectfully submit this summary of Cedar Corporation for your review.

SERVICES

Cedar Corporation is a professional service firm with disciplines in engineering, architecture, environmental repair, planning, landscape architecture, and land surveying. Founded in 1975, the company has grown in size and stature to its present staff of 85. Our staff is dedicated to the principles on which the firm was developed — professionalism, state-of-the-art technology, and service to clients. We have continued to grow because of our commitment to comprehensive service and good communication with our clients.

STAFF RESOURCES

Our staff resources include 17 Professional Engineers, 5 Professional Land Surveyors, 6 Planners, 2 Registered Architects, a Registered Landscape Architect, 3 Professional Geologists, 2 Wisconsin DNR Qualified Hydrogeologists, 4 Environmental Specialists, 1 Hazardous Materials Manager, and a strong support staff of technicians and administrative personnel. All of these individuals take pride in continuing education course work to stay abreast of current developments within their professions. To provide a work setting that meets the challenges of the industry as well as the skill levels of the employees, the company maintains a state-of-the-art computer network and related technology.

PHILOSOPHY

Cedar Corporation undertakes each project with a pledge to our clients that they will receive the best value-per-dollar spent on their projects. We recognize that our clients are most concerned with three major issues as they engage the services of consultants – quality, timeliness, cost.

Quality

Cedar Corporation is committed to providing our clients with the best solutions, satisfying the programmatic parameters. We strive to provide the best service to our clients by promoting excellence within our own firm.

Timeliness

Equal in importance to quality is timeliness, which is critical to the client in making swift and accurate decisions regarding project development. The success or demise of a project is tied directly to the timing of the documents necessary for funding, municipal approvals, and construction. As important as any design issue is scheduling; we have the flexibility to mobilize our resources according to the demands of the project and maintain continuity of its development.

Cost

The project budget is based on the scope of services provided. Cost estimating will verify compliance with the established budgets or, in some cases, point out programmatic or design deficiencies. Through our experience and industry aids, we have an exemplary record of predicting costs of our services and of construction costs—well within industry standards.

The issues of timeliness and cost are interlocked with each one influencing the project as a whole, as well as each other. We recognize this relationship and consider each to be critical to the success of the project, while also being the judge of our performance. It is this attention to our clients' concerns that sets Cedar Corporation apart from our peers - we pledge to you our commitment to excellent service.

CIVIL/MUNICIPAL ENGINEERING

- Streets, Roads, and Highways
- Water Supply, Storage, Distribution
- Municipal Engineering
- Site Selection Studies
- Traffic Studies
- Storm Water Management
- Industrial Park Layout
- Flood Control Analysis
- Solid Waste
- Cost Estimating

STRUCTURAL ENGINEERING

- Bridge Design
- Bridge Inspections
- Construction Inspection
- Dam Design and Analysis
- Building Design and Analysis
- Structural Assessments
- Foundation Design and Analysis

WASTEWATER SERVICES

- Facility Planning
- Wastewater Treatment Facility Design
- Construction Services
