

STR Building Resources (STRBR) provides comprehensive professional services for the analysis and resolution of problems associated with building envelope components. The firm designs and executes appropriate roofing and waterproofing solutions for a diverse client base.

Company Inception

STRBR was formed in January 2003 by merging the expertise of roof consultants Tony Loden, CCS, and Jim Clark with STR Partners, an award-winning architectural firm with an education and corporate portfolio. The combined resources of STRBR and STR Partners offer clients a single source for innovative building envelope solutions.

Experience

STRBR brings a broad range of experience to each project. The staff has more than 100 years of roofing industry experience to your project.

Affiliation with STR Partners

In addition, the knowledge and experience of STR Partners is an asset available to all of our clients.

Founded in 1969, STR Partners is known for on-time, on-

budget project delivery and direct principal involvement from project inception to completion. The firm has architects who are registered in Illinois, Wisconsin, Indiana, Ohio, North Carolina, New York, Hawaii, Guam, Philippines, Indonesia and Singapore. Access to registered architects is essential for projects that require professional certification.

STR Partners' affiliations include the American Institute of Architects, National Council of Architectural Registration Boards, International Facility Managers Association, Council of Educational Facility Planners International and the U.S. Green Building Council.

Service to You

STRBR operates on the premise that our most qualified people spend their time directly involved in your project, which translates into expertise and service to you. Your important project is always managed by experts, rather than delegated to support staff.

Successful projects are the result of excellent communication between STRBR and our clients and contractors. Communication begins at the inception of your project, and continues into the design, construction documents and construction phases.

A thorough survey of existing conditions, testing, and analysis – combined with comprehensive construction documents and specifications – details project requirements that are essential to good communication. Construction documents and specifications are prepared to be easily read and understood, thus encouraging competitive bidding and excellent workmanship.

Expert personnel conduct frequent on-site visits to ensure compliance with construction document requirements and professional workmanship.

Accuracy, timeliness and good communication result in outstanding quality and value – on time and on budget.

PROJECT EXPERIENCE

Tony Loden directs all activities relating to STR Building Resources' projects.

Mr. Loden has approximately 30 years of roofing industry experience. He brings more than 17 years of experience in performing visual roof surveys, roof core sampling and laboratory analysis. He executes field inspection and observation services for new roofing and maintenance roofing applications. He also prepares written reports of analysis work, budget estimates, roofing specifications and details for an assortment of different types of facilities. As an expert in his field, he has performed forensic investigations and roof failure analysis for many legal cases.

Tony Loden has directed several thousand projects, including industrial facilities, mixed-use facilities, corporate and commercial facilities, and institutional and public facilities.

Clients maintain that Mr. Loden's hands-on experience and extensive expertise provide them with finished projects that routinely exceed their expectations.
